About Fuego Synthetic Grass

Fuego Synthetic Grass is committed to and specializes in mid to high-end synthetic sod. Our ownership comes from the installation end of the industry, so we know exactly how to assist contractors combat the challenges that they encounter. We are here to help you obtain the tools, information and products that are needed to be successful in this industry.

Our mission is to help contractors build their business by helping them obtain tools and offering them training, education and technical support.

About Our Products

At Fuego we are an environmentally conscientious company offering cost effective synthetic sod, artificial grass and putting greens. We only use the finest quality components such as Thiolon Grass Fibers. Our products have highly tear-resistant backing and are thermally stable, non-toxic, lead free and what's great is the low maintenance.

Fuego Grasses are specifically designed and manufactured to simulate the softness, texture, density and color of natural grasses. Fuego Synthetic Sod is manufactured to precise specifications in order to achieve optimum pile height and density to create a surface that is truly realistic. Our grasses are made in ISO 9001/ISO 4001 certified and compliant environments.
